

Finding the Mac Address in Windows Vista

1. **Click** on the Windows Button and then type in **cmd** in search dialogue box and press **enter**.

2. In the box that opens type **ipconfig/all** and press **enter**.

3. You will need to scroll up or down looking for the right wireless connection information. Look under the "**Wireless LAN adaptor...**" look for the "Physical Address" and this will be your Mac address.
